## Complete Water Analysis Solutions for the

# **FOOD INDUSTRY**

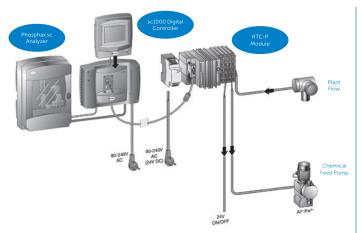

## The Water Analysis Experts for Food Processing

With more than 60 years as the leading expert in water quality analysis, you can trust Hach®'s knowledgeable and responsive support team to address your unique water quality needs for the food processing business.

Hach provides laboratory, online, portable, and service solutions for routine and challenging food applications. Hach has the most comprehensive coverage of influent and process water quality, product loss monitoring, and wastewater treatment parameters to support food processing plants.

Influent Water Boiler/Cooling Product Loss Quality Control Wastewater Optimisation

### **Featured Water Analysis Solutions**

#### **Total Organic Carbon (TOC)**

#### **Biotector B7000**

Designed for applications with high levels of salts, fats, oils, and greases, the Biotector B7000 features wider tubing to prevent clogs and patented self-cleaning technology to reduce instrument downtime.

The B7000 can be used in the wastewater treatment plant to monitor TOC, TIC, COD, BOD and TIP or on the production line to identify areas of product loss.

#### **Real-Time Control Solutions**

#### **RTC-ST**

Automate polymer dosing in your DAF to achieve greater consistency and control. Hach's RTC-ST doses polymer based on solids concentration and flow rate for optimal solids treatment.

#### RTC-P, RTC- N/NDN

Optimise nutrient removal with Hach's Real-Time Controllers for Phosphorus and Nitrification control. RTC allows you to treat your water based on real-time measurements, so you can feel confident your effluent meets permitted levels and you are not wasting resources on overtreatment.

#### **Biotector B3500c**

Provides maximum reliability and uptime, without sacrificing accuracy. Built for condensate and clean water applications, the B3500c has the lowest cost of ownership available.

#### Flow and Sampling

#### **AS950 Sampler**

Collect and store unbiased representative water samples for lab analysis.

#### **Predictive Diagnostic System**

#### **Prognosys**

Know with confidence whether changes in your measurements are due to changes in your instrument or your process.

#### **Titration**

**PROGNOSYS** 

#### Titralab AT1000 and KF1000 **Series Titrators**

Available in food specific configurations, the AT1000 simplifies titration with pre-set methods and one-touch automatic operation.

#### **SERVICE SOLUTIONS**

Hach Service can help with your maintenance and support challenges whether it is a lack of resources, an instrument that is down, bringing your plant back online, or the need for a predictable budget.

#### **COMPREHENSIVE WATER ANALYSIS SOLUTIONS**

Whatever your water analysis challenge, Hach has the most complete solution - including easy-to-maintain online instrumentation, accurate laboratory equipment, comprehensive test kits, and high quality prepared reagents measuring the broadest range of test parameters in the industry. Hach's solution-based approach saves you time on design, installation, training, maintenance, and operation.

Influent Water Boiler/Cooling Product Loss Quality Control Wastewater Optimisation

#### **Photometry**

#### **DR Spectrophotometers**

Available for benchtop and portable use, Hach's spectrophotometers are preprogrammed with food specific methods and designed for superior accuracy and reliability.

#### **Turbidity**

#### **TL2300 Turbidimeter**

The TL23 Series laboratory turbidimeters blend trusted technology and improved features to simplify testing in the most demanding wastewater and industrial applications.

#### **Chemistry and Microbiology**

#### **Hach Cuvette Tests**

Hach cuvette tests are simple, fast and safe to use. Available for 50 parameters and more than 90 measurement ranges.

#### Solitax & TSS sc Sensors

Reduce the potential of putting excessive solids into wastewater stream by measuring turbidity and TSS. These are most commonly used in discharge reporting.

#### **Microbiology**

Detect the presence of bacteria and microbes before they become a larger problem.

#### **Online Electrochemistry**

#### Dissolved Oxygen, pH, Conductivity and ORP Sensors

From monitoring pH of incoming process water to dissolved oxygen in the treatment plant), Hach's sensors and controllers will help optimise performance with online electrochemistry.

#### **Laboratory Electrochemistry**

#### **HQD Meters & Intellical Probes**

Range of probes for routine and challenging food applications, including measuring levels in solid and semi-solid substances

#### **Chlorine**

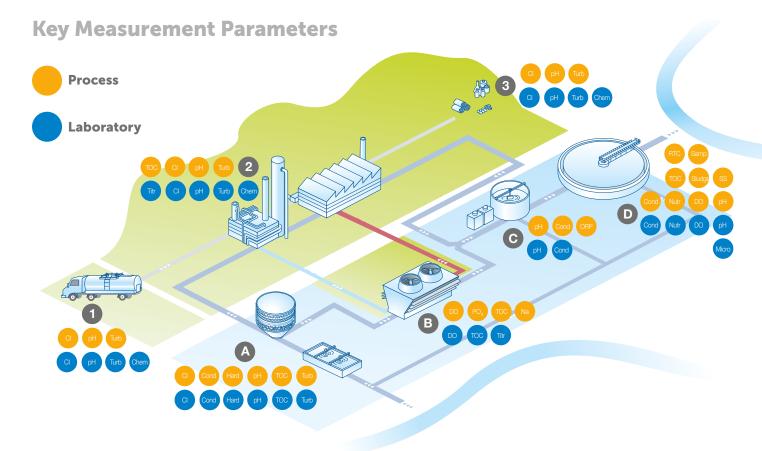

#### **CL17 Analyser**

Ensure influent process water meets your expectations by continually monitor your water for chlorine.

## Your Partner on the Path to Optimisation.

**Water Conditioning and Pretreatment** 

- Delivery of Stock
  - Production B Power Generation and Cooling
- 3 Finished Goods

- **D** Wastewater Treament

Chem	Chemistry
Cl	Chlorine
Cond	Conductivity
DO	Dissolved Oxygen
Hard	Hardness
Micro	Microbiology
Nutr	Nutrients

ORP	Oxygen-Reduction Potential
рН	рН
PO <sub>4</sub>	Phosphate
RTC	Real Time Controller
Samp	Sampling
Sludge	Sludge
Na	Sodium

SS	Suspended Solids
Titr	Titration
TOC	Total Organic Carbo
Turb	Turbidity
