

Infrared Sterilizer

Applicable scene: EMedical, pharmaceutical, high efficiency, scientific research, etc

■ Presentation

sterilization only takes 5-7 seconds.

small volume, light weight.

easy to clean.

used in anaerobic chamber.

wide range of applications (inoculating loop, inoculating needle or culture tube mouth).

■ Products

■ Parameters

Model	DS-900	DS-900S
Power	150W	240W
Max.temperature inside the heating hole	825°C±50°C	
Heating temperature	Two temperatures available 400°C/850°C	
Max.diameter of sterilizer goods	φ14mm	φ35mm
Length of heating zone	150mm	100mm
Warm-up time	10min	

Water Bath with Magnetic Stirrer

Applicable scene: EMedical units, colleges and universities, scientific research, chemical industry, etc

■ Presentation

Stainless steel inner tank.

Double magnetons stirring · More uniform distribution of temperature

Built-in heating pipe · Safety experiment.

Anti-dry burning function.

Transparent tall cover.

■ Products

■ Parameters

Model	WB-6S	WBS-6Pro
Speed/Increment	/	100-1200RPM/50RPM
Temperature range	Room Temp.+5°C-100°C	Room Temp.+5°C-100°C
Liner size	200*200*130mm (depth)-2L flask or 3L beaker	
Product size	260*265*325mm	260*265*325mm
Display Accuracy	±0.1°C	±0.1°C
Power	800W	800W
Timing range	1min-23h59min	1min-23h59min
