

Motorized PCB Depanelizer

Multi-blade PCB Depanelizer, CWVC-5 Features:

- 1.It can cut many boards with multiple sets of knives work at the same time.
- 2.The knife flywheel is adjustable as a whole from 0 to 5mm
- 3.The distance between knives is regulable as well, satisfy to cutting the single PCB width from 15mm-20mm
- 4.The blade is made of Japan imported high speed and high precision steel material, which is durable and have a long service life.
- 5.It is convenient to adjust the cutting speed through rotary knob
6. No limits of the cutting length.
- 7.Thickness range of PCB: 0.8-3.5mm
8. With a conveyor belt line, the separated PCB can be send out directly to reduce pick- and-place.
- 9.The machine adopts multiple blade to separate boards with simple operation and high efficiency.
10. It can connect the production line to separate the PCB, fitted for batch production.

Multi-blade PCB Depanelizer, CWVC-5 Specification:

Max cutting length	No limit
Min cutting length	100mm
Max cutting width	160mm
Custom cutting width	300mm
Min PCB width	8mm
PCB thickness	0.8-3.5mm
Feeding speed	0-500mm/s
Working tem.	10-35°C
Blade material(auto-lock function)	high precision steel
Storage tem.	-20-50°C
Voltage	110-220V
Dimension	2160*570*1050mm
Packaging weight	424kgs
