# CEO Message

Though our country, Korea has an excellent competitiveness based on the technology even in the global endless competition days, the dependence on the advanced countries is as high as what it could be said to be technically governed in the gas sensor and gas safety equipment industry.

The gas sensor technology which could create the high additional value grafting with another industries, is one of the prospective technology which are growing very fast, as the environment and safety are being highly concerned.

Senko Co., Ltd had developed sensors of the carbon monoxide, hydrogen sulfide by our own technology, starting the oxygen sensor, We had also developed to produce the gas safety equipment and its

system such as the portable gas detector in the industrial field.

We have been doing our best to localize the Korean domestic market which dominated by foreign countries' products as well as to develop the oversea market.

We will do our every possible efforts to be together wherever with our customer and surely stand based on the venture enterprise spirit in the industrial safety gas equipment area which the domestic enterprise never concerned, We are trying to develop the more efficient, convenient products for the customers, using the new technology as well as the conventional gas safety equipment.

We will establish the strategic partnership with the excellent institute/enterprise who have the technical competitiveness in another industries We will be born again to focus to develop the new product of the high additional value technically fused through the co-research based on this partnership.

Being one family based on the mutual trust to become the world wide company, we will found the business culture which all staffs could do our best. We promise to show our customers our efforts to do our best for the customer satisfaction. Please watch us with the friendly warm view.

Thanks.

Portable Single Gas Detector  
● **SP2nd**

### Explication and Features

SP2nd is an economical gas detector that can be operated continuously for two years without replacement of gas sensor to protect workers from the disasters caused by the oxygen deficiency or toxic gas poisoning. Measure one gas continuously and display its concentration and raise an alarm when a risk occurs.

- Rubber material case for the shock protection
- The excellent water proof/dust proof structure
- High performance audible, visual, vibration alarm
- Setting 1st, 2nd alarm
- Automatic checking of the sensor trouble
- Data logging
- Disposable type (Under development)

Portable Multi Gas Detector  
● **SP12C7**

### Explication and Features

SP12C7 is an united gas detector measuring four (4) major gases, which result the most of the industrial accidents, to protect workers from the disasters caused by the oxygen deficiency, toxic gas poisoning and gas explosion. Measure continuously four (4) gases (O<sub>2</sub>, CO, H<sub>2</sub>S and Combustible Gas(CH<sub>4</sub>)) and display their concentrations and raise an alarm when the risk occurs.

- Simultaneously check 4 different gases (methane, oxygen, carbon monoxide, hydrogen sulfide)
- Explosive proof structure for the safety
- Rubber material case for the shock protection
- External pump and probe installation
- Automatic light on when alarming
- Both rechargeable battery and alkaline battery are compatible
- The excellent water proof/dust proof structure
- Data logging

Charger  
● **SP-Charger201**

### Explication and Features

SP- charger 201 is provided with SP12C7 as a basic package

- The handy stationary charger
- With one electric sources, several chargers can be used simultaneously
- Electric source and charging status LED

### Instruction Of Use

Sampling Pump  
● **SP-Pump101**

### Explication and Features

Sampling pump is designed to be used by connecting to SP12C7 and SP2nd model. This can be used to check if there is gas leakage when measure the gas underground manhole.

- Simple structure to install locking
- Excellently durable industrial pump installed
- Automatic checking of chocking

### Instruction Of Use

### Specification

Power	AA size Alkaline battery 1ea
Operating time	More than 10 hours
Operating temp. & Humi.	-20°C ~ +50°C / 5%~95% RH(non-condensing)

Self Checking	Low flow alarm, Low battery alarm (Red LED)
Dimensions	34(W) x 270(H) x 47 (D)mm
Weight	200g (with battery)

### Applications

- ▶ Steelworks
- ▶ Petrochemical plant
- ▶ Shipbuilding yard
- ▶ Sewage treatment plant
- ▶ Mine
- ▶ Power supply works
- ▶ Hermetically sealed area (manhole, tank)

Portable Gas Leak Detector  
● **SP secure**

### Explication and Features

SP secure is designed to be suitable for leak detection of any gas piping and valves by equipping a built-in sampling pump. Since the measured gas concentration is displayed in digital number, accurate measurement is possible.

- Sampling pump built in structure
- The digital concentration display
- Detector for the gas leakage
- Both rechargeable battery and alkaline battery are compatible
- Adopt the sensor which detect the low concentrated
- Rechargeable battery is compatible with
- Data logging

Fixed Gas Detector  
● **SI-100**

### Explication and Features

SI-100 is a fixed gas detector installed in a place where potential gas hazard exists to measure oxygen, toxic gas and combustible gas. It shows not only the concentration of gas but also diagnostic result of the unit itself through the LCD display and can be connected to the controller with a standard 4~20mA analog output communication or RS-485 digital communication.

- SI-100 measures the concentration of the flammable gas, toxic gas, oxygen and display with LCD
- Easy magnetic bar operation
- Big digital LCD installed with a blue backlight
- Explosive proof structure
- Water/dust proof structure
- Simple gas calibration

Gas Leak Detector  
● **SI-560D-S**

### Explication and Features

SI-560 SET is a gas detector for detecting oxygen, toxic gas and combustible gas. SI-560 SET is consisted of a detector and a receiver. This is used to detect gas leaks in the pipe or valve.

SI-560 SET is a low-priced entry-level products.

- Fixed Detector
- Explosion proof structure
- Long distance communication with 4~20mA analog output
- Built-in calibration mode
- Convenient installation

Wireless Gas Detector  
● **SL-101**

### Explication and Features

SL-101 is a fixed gas detector installed in a place where potential gas hazard exists to measure oxygen, toxic gas and combustible gas. It shows not only the concentration of gas but also diagnostic result of the unit itself through the LCD display and can be connected to the controller with RF communication wirelessly.

- Easy Installation/removal because no wiring works are required
- Economic system which doesn't require any wiring construction
- Water/Dust proof structure
- Same functions with Fixed Gas Detector working with wiring electrical power source
- Tracking is possible with its own address
- Maintenance and Replacement are simple

Gas Sensor  
● **GAS SENSOR**

- Oxygen sensor SS1118 (0~100%)
- With high concentrated oxygen measuring sensor, only for the Oxygen generator and medical sensor
- Measure the oxygen's pressure in the air

- Hydrogen sulfide sensor SS1198
- Suitable to monitor the petrochemical, oil refining, waste water treatment, drain water treatment, manhole, mining

- Oxygen sensor SS2118 (0~30%)
- As the measuring sensor of the oxygen in the air, suitable for the portable equipment and industrial equipment
- Excellent accuracy and response time

- Ammonia sensor SS11N8
- Suitable to monitor the livestock waste, food decay, ammonia leak, and processes
- Comparing the competitor's product, much faster response

- Carbon monoxide sensor SS1128
- Fire monitoring application for the portable equipment, industrial safety equipment, boiler room, parking place
- Excellent stability of the output signal and little affected by other gases

- IR (Infrared) Sensor
- Gas measuring Sensor only for the flammable gas and carbon dioxide, nitrogen dioxide
- The Infrared sensor which has Very fast response and excellent accuracy can measure the flammable gas in the nonoxygen space

- Hydrogen sensor SS1178
- Suitable to monitor the power plant, hydrogen fuel battery, hydrogen tank, hydrogen leakage and processes
- Minimize the interference on the hydrogen sulfide

Gas sensor module  
● **SM16X1**

## Explication and Features

Generally, the gas sensor could be divided as 4 kinds such as the electric chemical type, the semi-conductor type, the optic type, the catalytic. The application of each sensor type is quite different. It is important to adopt the proper gas sensor depend on the gas type, environmental factor in the using area, sensing range, resolving ability, cost, etc. Senko Co., Ltd is trying to provide the most proper gas sensor and modules depend on customers' requests, keeping lots of the technology development and Know How related with the gas sensor.

- The carbon dioxide sensor module sequenced with the air conditioner
- The small sensor module for home appliance (TVOC sensor adopted)
- Hydrogen detecting module for the fuel battery
- Electric sensor transmitter only for the electric chemical sensor type
- Concentrated Oxygen Sensor Modules for the Oxygen Generator
- Concentrated Odor sensor module
- Module related with the electronic nose

Breath CO Monitor  
● **BMC-2000**

## Explication and Features

BMC-2000 can be used in smoking cessation programs by healthcare professionals. And it also can be used as a noninvasive method to get %COHb in the patient's blood and to screen CO poisoned patients by medical man. The small size and light weight make the BMC-2000 ideal for hand held use. It is mainly used in smoking cessation clinics; it is used for instructional purposes to check on the client's progress and compliance.

- Non-Invasive method to know how much carbon monoxide(CO) poisoned
- Indirect and simple instrument to measure carboxyhemoglobin(COHb) in blood
- Easy to discriminate smoker
- Easy to recognize the degree of CO poisoning (smoking habit)
- Two language (English, Korean) are provided
- CE certificate of European medical equipment
- Concentration of CO in breath and percentage of COHb in blood are displayed simultaneously
- Adult / Pregnant / Young mode are provided

## Specification

MODEL	BMC-2000
Detecting range	0~99ppm
Sensor type	Electrochemical
Accuracy	±2% or 1ppm / month
Sensor drift	1% / month
Cross sensitivity (Hydrogen)	5~10%
Sensor life time	2 ~ 5 years (max. 5 years)
Resolution	1ppm
Calibration	Zero / span
User mode	Adult / Adolescent
Countdown	15 seconds
Sound	On / Off
Operating Temp. & Humi.	0 ~ 40°C / 5 ~ 95%
Mouthpiece adapter	D type bacteria filter
LCD size	50x30mm
LED indicator	7 steps (Green/Amber/Red)
COHb%	Display
Power	AAAlkaline battery 2ea
Dimensions	70 × 150 × 32mm
Weight	160g
Disposable mouthpieces	Diameter 22mm

# Carbon Monoxide Alarm

## Explication and Features

What is Carbon Monoxide?  
CO is an invisible, odorless poisonous gas that can be fatal when inhaled. It is the number one cause of unintentional poisoning deaths in the Country.  
CO is produced when any fuel is incompletely burned because of insufficient oxygen.  
Wood fires and charcoal grills produce large amounts of CO.  
Malfunctioning heating systems also produce CO.

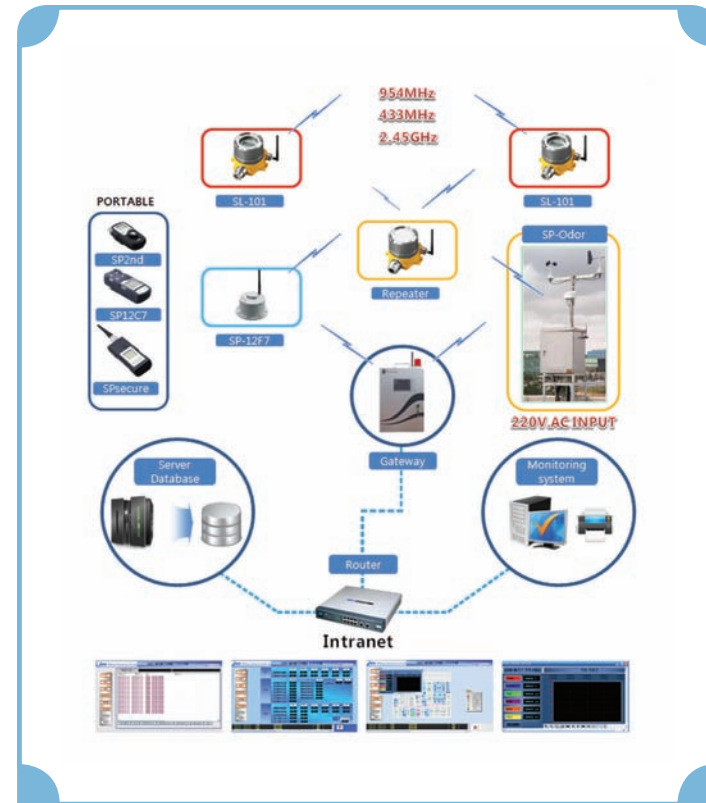

## Specification

Sensor type	Electrochemical cell
Power	3-AA Batteries (4.5V)
Alarm Indication	Audible and visual alarm
Audible Alarm	85decibels(dB) at 10' (3.05m)
Alarm Response Times	70 PPM between 60 to 240 min., 150 PPM between 10 to 50 min., 400 PPM between 4 to 15 min. (as required by UL2034)
Alarm Life	5 years under normal operating conditions
Temperature	-20°C ~ +50°C
Humidity	-5%~95% RH(non-condensing)
Weight	140g approx.
Dimensions	110 x 70 x 42mm
Test Function	Yes
End of Unit Life Warning	Yes
Low Battery Warning	Yes
