

## Specification

|   |   |
|---|---|
| Model                                     | SH-FU-100TS                                 |
| Temp Controller                           | Programmable Controller                     |
| Applicable Tube Diameter                  | 100Φ  |
| Heater Capacity                           | 6.5 KW                                      |
| Dimension Hot Zone                        | Length 300 mm                               |
| Demension External (WxDxH)                | 690x600x1030(mm)<br>27.17x23.62x40.55(inch) |
| Heater Element                            | SIC   |
| Insulation                                | MoSi2                                       |
| Electrical Requirements 230V ,50/60Hz, 1Φ | 30A   |
| Max Temp                                  | 1700° C (3092° F)                           |
| Weight                                    | 114 Kg                                      |

## Feature

- Automatic reset function incoming power cut
- Over temperature protection

## Option
