HT68 series power supply is high performance single-output programmable DC power supply with communication interface, possessing the character of fast rise time speed (The rise speed of HT68II power supply can be less than 10mS and the HT68SI can be less than 20mS). The combination of bench-top and system feature in HT68 power supplies provides versatile solutions for your design and test requirements. The HT68 series can not only be programmed through the keyboard on the panel, but also be functioned as voltmeter and milliohm meter, which will bring great convenience to the users. As a regeneration product of ordinary programmable power supplies, HT68 series power supply is more cost-effective.

HT683I power supply, a new generation of programmable linear power supply, are designed with high-speed dynamic programming output (voltage 0~30V, 1ms rising time), high current accuracy (0.001mA resolution) and low internal resistance, which can satisfy all the test requirements. Meanwhile, the voltage level switch works without relay, which will cause the fast switch between high voltage and low voltage. Moreover, HT683I power supply provides the best solutions for cellphone research, micro-electronics lab, research institute and special users requiring power supply with low current but high accuracy.

Features

- Low ripple and noise
- High resolution and accuracy (0.1mV/0.01mA, HT683I reaches up to 0.001mA)
- Built-in a high-accuracy 5 1/2 voltmeter and milliohm meter
- Supporting high-accuracy dynamic programming output
- High-luminance VFD screen and two lines& four ways display
- Smart fan will be automatically initiated according to the temperature
- Supporting remote voltage compensation and multidata storage
- Supporting external trigger input and output
- Power-on self-test, software calibration and standard rack mountable
- Supporting RS232/RS485/USB interface

Application

- Laboratory testing
- Power electronics production line testing
- Other automatic testing systems, etc.
- Functioning as voltmeter and milliohm meter
