

Automatic Flat Screen Printing Machine(GW-5070AT)

Zoom

Model number: GW-5070AT

Printing area: 500*700mm

Printing speed: 800pcs/hour

MOQ: 1 Set

Payment terms: T/T,Western Union,Paypal,L/C

Package way: by wooden box

Delivery way: by sea or by air

Lead time: Within 3-7workdays after get client's deposit

Worktable size: 600*850mm

Automatic Vacuum Flat Bed PCB/PVC Circuit Board Screen Printer

Application:

It is suitable for printing kinds of materials flat surface items such as aluminum sheet, metal board, PCB circuit board, CD/DVD, glass sheet, wooden board, acrylic....etc

Structures:

1. PLC program controller and touch screen panel control
2. Machine up/down, left/right movement adopts variable frequency electric motor driving. It adopts linear guide.
3. Automatic robot loading system, with controlled by high precision servo. save labour, high speed.
4. Vacuum table can fix the products better when printing it.
6. It can connect with infrared tunnel drying machine used to dry products after printed it.
7. Auto 4-digit counter built-in, Airframe adopts coin alloy with metal coating surface, strong.
8. distyle vertical constructure, high precision, steady operation
9. installing scraper constant pressure equipment to make sure pressure is steady when printing
10. Installing scrambling device on up of worktable in order to avoid injuring hands and make operate safety
11. Machine installed Taiwan CEC absorbers to removing shaken, make machine working steady.
12. printing head can be lifted up, that is convenient to pick-and-place screen frame
13. adopting Germany ORIGA rodless cylinder to drive transversa moving, TaiWai Ruike electronic switch to drive transversa stroke

Technical Parameter:

1. Max. printing area: 500*700mm
2. Max table size: 600*850mm
3. Max screen frame size: 750*1000mm
4. Max printing single workpiece thickness: 0-20mm
5. Max printing speed: 1000pcs/h
6. Air compression: 0.4-0.6MPA
