

# SKD-7000 Series

- 1.Low-voltage automatic clutch electric screwdrivers with power controllers, can keep long-time operation, high stability, no influence by fluctuated voltage.
- 2.Be operate with torque fixing ring (KC-2) most applied to office machines, PC peripherals.
- 3.High technology motor, made by extra strong magnet, fast start and low electric current. Fan and vent let motors fast heat emission, low temperature for successive using.
- 4.Clutch is made by alloy steel materials made in JAPAN, solid and endurance, fatigue-resistant, high stability and long lifespan.
- 5.Precise torque is able to set from small to large, range stepless, stable, fast speed, easy operation and high working efficiency.
- 6.Any screw and socket can be used. As fastening process reach pre-set torque, clutch will be automatically stopped as well.
