

## AS1392 EMF Tester

**Product No.:** AS1392

**Introduction:** The EMF tester is a cost-effective, hand-held instrument designed and calibrated to measure electromagnetic field radiation at various bandwidths.

### FEATURES

- One EMF Tester with two uses, testing the electric field and the magnetic field radiation at the same time. Measure radiation of high voltage power lines, appliances, electrical wires.
- Sound-light alarm, when the test result exceeds the safe value, the instrument will alarm automatically.
- Data hold and max measurement, one-key lock the radiation value.
- Large & clear LCD display of the values for easy reading.
- Easy to operate with easy one-hand operation, easy to carry and make field measurement.
- Can measure the environment temperature with 2 temperature units (°C and °F).

### SPECIFICATIONS

Measuring Range	0.1m~1999m Gauss; 0.01μ~200μ Tesla
Resolution	1mG, 0.1μT
Accuracy	± 5% (50μT ~ 200μT) μT; 50 hz / 60 hz
Sampling rate	0.5 sec
Number of Axis	Single Axis Inductive Head
Test Mode	Bimodule Synchronous Test
Display	4 digits LCD Display
Operation Condition	0°C~40°C, 0~80% RH

**PACKING INFORMATION**

Power	3*1.5V AAA batteries
Product Net Weight	75g
Product Size	135*47*25mm
Standard Carton Size	22 x 15 x 3.5cm
Standard Carton Gross Weight	108g
