• **AS964 Underground Metal Detector**

Product No.: AS964

Introduction: Metal Detector uses an electromagnetic field to detect the presence of a concealed metal object. Metal detectors are used at security checkpoints to detect metallic weapons, but they cannot detect weapons made of plastic or ceramic. They are used to find gold and coins in the ground, and can also find land mines.

FEATURES

1. Apply an electromagnetic field to detect and identify the metal hidden buried in the ground or other medium.
2. LCD analogue display and audio indicate the detection of metal.
3. With bright LED light, the detector can be used in dark.
4. Powered by a rechargeable 7.4V lithium battery, can be used for a long time.
5. Earphone sound mode for using in noisy environment or at night.

SPECIFICATIONS

Detectable Indication	Analogue Display/Audio
Maximum Explore Depth	2.5m
Detectable Mode	Ground Balance/Discrimination
Explore Frequency	7.0khz
Can Detect Objects	Metal
Low Battery Indication	√
Backlight Display Function	----
Consumed Power	0.5W

Working Temperature	10-60°C
Storing Temperature	-28-65°C
Light Function	√
External earphone jack	√
PACKING INFORMATION	
Power	1200mA Li-battery
Product Net Weight	2380g
Product Size	30*30*113.5cm
Packing	Inner box
Standard Quantity Per Carton	6PCS
Standard Carton Size	39.5*38.5*33.5cm
Standard Carton Gross Weight	15.5KG
