

## **QC-902 Spring twist test machine**

### **Standard**

---

### **Description**

---

Spring twist test machine specialized in large test range, fast speed, test angle operated by program.

### **Appearance**

---

## Specification

---

Max twist	9N-m
Specimen quality	4
Max speed	0.1~100rpm
Max measurement times	9999999
Machine Dimension	80×70×82(cm)
Wooden crate dimension	100×90×120(cm)
Machine net weight	120kg
Machine gross weight	185kg
Power	220V,AC

## Feature

---

The tooling made by separated design able to cooperate with different tooling. Spring twist machine is the best choice because allow all kinds of specimens.

To test the fatigue of torsion of spring is to design a unit fixture according to different type of spring, to set the fixture on testing place and to do the torsion test in different angles. This tester is opening design to leave space for setting the specimen. Max. 4 specimens are available to be tested together at same time.

\* Comotech reserves ultimate modification right of product specification.
