

Distinctive "performance" and "design"
The leader of 4th-generation digital testers

KMT

► Summary

The tester is to evaluate the fatigue of the stimulus by giving fatigue to the product or specimen that is complied with the reliability test requirements. Designed and manufactured to meet the requirements of the customer. It is an indispensable device for evaluating the durability and testing the limits of the components of the automobile. This design is initiated by the customer's request.

KTE-800 / Torsional Rotation Durability Tester

► Features

- Hydraulic torsional durability testing machine

■ DETAILED INFORMATION

► Specification

Drive : Hydraulic Cylinder + Servo Valve

Controlling Method : PC Control

Capacity : 300kN.m

Angle : 0 ~ 360°

Size : 3,000(W) X 2,000(D) X 1,800(H) mm

► Application

All types of specimens requiring torsional fatigue, endurance testing
