Multimeter Infrared Thermal Imager and Bluetooth Interface HDM 15

Digital multimeter PCE-HDM 15

Digital multimeter with thermal imager / TRUE RMS / Resistance measurement / Current measurement / Voltage measurement / Rechargeable battery / TFT color display / Bluetooth interface / LED lamp

The digital multimeter PCE-HDM 15 is a universal and robust measuring device. With this digital multimeter, voltages, currents, resistances and many other electrical quantities can be measured. As an additional function with the digital multimeter, a Bluetooth connection with a smartphone can be established. The digital multimeter automatically sends live all measured data to a smartphone. The smartphone itself becomes a data logger. From there, the data measured and sent by the digital multimeter can be analyzed and, for example, transmitted to a PC or sent.

Thanks to the built-in thermal imaging camera in the digital multimeter, temperatures of surfaces can also be measured. This allows temperature measurements from a distance with the digital multimeter. The sturdy rubber holster makes the digital multimeter robust in use in the workshop, on the construction site or in schools for training purposes.
