## **PCE-RCM 15 Thermometer**

## Monitoring device for indoor air quality measurement / Measures 7 air quality parameters simultaneously / Built-in alarm function

The air quality measuring device is specially designed for monitoring the ventilation quality of interiors. Among other things, the PCE-RCM 15 air quality meter measures the parameters for PM1, PM2.5, PM10, TVOC, formaldehyde, air humidity and temperature. All measured values are displayed on the large display.

Thus, the air quality meter is particularly suitable for applications in offices, schools and other educational institutions but also in living spaces. On the display can be switched by switching between the individual measuring functions. The measured values are processed and visualized both graphically and numerically on the air quality measuring device. In addition to measuring the air quality, the air quality meter has an alarm function.

- Large color display
- 7 in 1 air quality meter
- TVOC, HCHO, Temp., Airf., PM1, PM2.5, PM10 (Only displays in °C)
- Battery and mains operation, A/C power adapter
- 3 different display modes
- Alarm function
