Environmental meter PCE-PH 17

pH tester / For easy laboratory measurement / Complete glass electrode / Simple operation / Manual one-point adjustment

The pH tester PCE-PH 17 is a pH meter with a pH electrode made entirely of glass. The fact that the electrode of the ph-tester is made of glass makes cleaning the electrode easier and more thorough. With an accuracy of \pm 0.1 pH and a resolution of 0.01 pH, very accurate measurements can be taken with the pH tester. Thus, the pH tester is ideal for simple laboratory measurements.

The BNC connector also allows alternative electrodes to be connected to the pH tester. Thanks to its ease of use, the pH tester can be easily readjusted to another electrode.
