

DRAMINSKI DogScan

Take care of your breeding with the DRAMINSKI DogScan.

Why should you have DRAMINSKI DogScan?

You will quickly appreciate advantages of this ultrasound scanner designed for dog breeders, because:

YOU WILL BE ABLE TO DETECT PREGNANCY ON YOUR OWN

The ultrasound scanner is easy to operate and it has an excellent image. This allows detection of pregnancy independently. What you have to do is to apply the probe to the dog's abdomen and see how many puppies are supposed to be born. More than that, if you carry out ultrasound diagnostics yourself it is less stressful for your animals.

YOU WILL GUARANTEE THE HIGHEST STANDARD OF CARE

Thanks to image diagnostics of your pet you will learn more about its condition. You will be able to observe the pregnancy and first of all you will have a chance to react quickly, if something goes wrong. Your pet requires such care.

YOU WILL IMPROVE THE PROFIT OF YOUR FARM

Fast ability to detect pregnancy means an increase of your profit. Thanks to immediate estimation of the animal's condition you will be able to manage the procreation more efficiently. Costs connected with unnecessary insemination will be reduced. You will be able to estimate the number of puppies before they are born, which allows you to plan the sale when the animal is still pregnant.

YOU WILL APPRECIATE THAT THIS SCANNER IS EASY TO OPERATE

The ultrasound scanner has basic and the most important functions necessary to detect pregnancy of animals. It operates in the most popular B Mode. Intuitive menu navigation makes a lot of useful options accessible: **FREEZE** – that is image freeze, **GAIN** – that is amplifying the image, and **FOCUS** – that is an ability to make the image sharper at a required depth.

YOU WILL BE ABLE TO PERFORM QUICK DIAGNOSTICS

The DRAMINSKI DogScan was designed for breeders in order to carry out fast detection of pregnancy of small animals. It has an intuitive menu navigation, which allows you to carry out diagnostics independently. Thanks to an abdominal probe, which operates with the DogScan, you will be able to confirm or to exclude pregnancy through the abdominal wall.

COMFORT AT WORK – EXPRESS SERVICE

We know how reliable our ultrasound scanners are, that is why we give a 2-year warranty.

The set includes:

- the device with LCD screen and keyboard,
- 5.0 MHz sector probe, abdominal,
- a set of neck belts,
- external battery pack: Li-Ion 14.4V/3.1A,

- dedicated battery pack charger (with wires),
- transport suitcase with a foam filler,
- ultrasonic Gel,
- the manual.

Technical specification

Dimensions	17,5 x 14,5 x 6,0 cm
Unit weight	1010 g
Probe weight	250 g
Battery weight	280 g
Display modes	B Mode – real time imaging
Frequency and type of probes	sector, mechanical abdominal 3.0 – 7.0 MHz (the central frequency – 5.0 MHz)
Penetration depth	Up to 25 cm
Scanning angle	90°
Display	5,0", LCD LED
Keyboard	Membrane
Power supply	External battery pack Li-Ion 14.4 V, 3.1Ah
Continuous operation on fully charged battery	about 6 h
Charging time	2,5 h
Battery exhausted indicator	automatic – a sound signal and a graphical indicator
Operating temperature range	-15°C to +45°C
Storage temperature range	0°C to +45°C
