

YUYANG INDUSTRIAL CO., LIMITED

China Manufacturer of Fire Testing Equipment

90 / 45 Degree Flammability Tester Flame Retardant Test For Hard Casing

- **Product Details:**

- Place of Origin: **Chian**
- Brand Name: **YUYANG**
- Certification: **CE ISO UL**
- Model Number: **YY138**

- **Payment & Shipping Terms:**

- Minimum Order Quantity: **1 set**
- Price: **Negotiation**
- Packaging Details: **Plywood Box**
- Delivery Time: **20 work days**
- Payment Terms: **T/T L/C Western Union**
- Supply Ability: **5 sets per quarter**
- Share to :

Hard Casing Flame Retardant Performance Testing Equipment with Flame Height 100mm

Products:

Hard casing retardant performance tester - Intelligent is according to the provisions of paragraph 6.10 JG3050-1998 in combustion testing requirements to develop and produce. The equipment is divide into the intelligent and common type to meet the different needs of customers; Different material thickness chooses different fire time, in order to measure the material self-extinguishing test and apply to building insulation electrical conduit and self-extinguishing test. This equipment is used to test resistance-to-fire test of single catheter which is highly accurate, automatic timing, ending the test automatically, simple and easy.

Standard:

JG 3050-1998

Features:

1. The combustion chamber with paint treatment; nice, corrosion resistance;
Size: 650mm X 400mmx 1100mm
2. All sample holder made of stainless steel; corrosion resistance;
3. Import standard burner; Bunsen burner; Nozzle inner diameter is about 9mm;
4. Burner can adjust the angle of 90 °, 45 °;
5. The flame height level is about 100mm; The height of the blue flame is about 50mm
6. Automatic time recording, automatic storage; 0.1s timer accuracy;
7. PLC with touch screen control system; more intelligent test; recording test data automatically, automatic storage;
8. Imported brands pressure meter and pressure meter adjustment, the gas pressure is more stable
9. Imports needle valve, control of the flame height precisely; flame is more stable;
10. High intelligence, simple operation;
11. Automatic ignition system;
12. A flame height gauge;
13. 7 "touch screen with the programmable controller , to achieve control / testing / computing / data display.
14. Pulsed high voltage electronic automatic ignition.
15. Without holding the stopwatch ; the system automatically records the test of time,

and generates test reports;

16. The test time and fire time can be set by touch screen. Meet a variety of test standards;

17. Automatic timer device can record the test time and stored in the system; the report can be found;

Electrical:

1. The voltage: 220V, 50 / 60Hz;

2. Socket with grounding port;

Random with Annex:

1. Stainless steel flame height gauge

2. 2 pipe clamps;

3. Product specification;

4. Certificate of Approval;

5. Wooden packaging; safe and reliable transportation (freight transport);
