

Potato Peeler TBM-10

"Peeling through the competition!"

Design

Thunderbird is proud to once again design a machine better than any other. Our new potato peelers far exceed the capacity limits of most other machines like it in the industry. Restaurant owners and others in the food service industry are no longer required to manually peel potatoes nor continually load a peeler. Our

machines are safe and easy to clean. "Thunderbird quality without compromise!"

Specifications

Motor: 1/2Hp
