Haier Biomedical
Intelligent Protection of Life Science

Pharmacy Refrigerator
with TEC

With TEC technology for super low noise and minimum vibration

- Military grade TEC(Thermo electric cooler) to produce refrigeration effect
- Low noise DC fan
- Less than 35dB(A) sound level

Multi temperature protection

- Air temperature sensor for control
- Display sensor for displaying the actual temperature
- Hot end temperature sensor to protect TEC module for a service life of more than 10 years

Microprocessor control for 2°C to 8°C

- Forced air cooling with +/- 2°C temperature uniformity and display accuracy 0.1°C
- Maximum power for rapid temperature pulldown

7 inch LCD display

- Equiped with 7 inch LCD display with visual UI operating interface
- Authorized administration, safe and reliable.

The refrigerator can be used to store vaccines, medicines and laboratory products at 2 to 8°C temperature range in pharmaceutical companies, laboratories, clinics, and hospitals.

Qingdao Haier Biomedical Co.,Ltd.

Safer by Design

Theory of Operation: cooling power is controlled by pulsing signals to TEC modules for tight temperature control of +/-2°C

The advantage of compressor free refrigerator

TEC Technology

Sustainable & Non-toxic refrigeration
Energy efficient and low waste heat
No pumps or motors for quiet operation
No moving/mechanical parts for best reliability
Compact design allows more storage capacity
Lab & Clean room ready dust-free operation

VS

Conventional Compressor

Power hungry and high waste heat
Loud pumps and motors
Unreliable moving/mechanical parts
Bulky compressor steals valuable capacity
Expensive filtration required

Typical performance characteristics in 25°C ambient

PRODUCT DIMENSION DRAWING

Note:
1、W0---External width size;
2、D0---External depth size;
3、H0---External height size;
4、W1---Internal width size;
5、D1---Internal depth size;
6、H1---Internal height size.

MODEL	CODE	W0	D0	H0	W1	D1	H1
HYC-51BF		525mm	565mm	720mm	380mm	330mm	470mm

7 inch touch screen

- 7 inch LCD display with high-definition
- Paging interface management, simple and easy-to-read

Frost free cooling fins on TEC module cold end

- Defrost process initiated after accumulated run hours
- Temperature does not exceed 7°C during defrost process

Door auto-closure

- Door stays opened at 90 degree
- Door automatically swings closed at less than 90 degree opening once released to reduce moisture infiltration
- Satisfies requirement of 100,000 times door opening and closing

Removable trays with ABS material

- Adjustable three trays design
- Each tray holds thirty 50x50x50 mm storage boxes, totaling 150 boxes
- Trays designed for over 500,000 movements
- Weight limit at 100 kg/sq. M

Data log

Data can be downloaded through USB port from different time scale, CSV files are easy to open with MS Excel

Power protection switch and removable power cord

- Dual safety protections
- Power cord plug accessible on external of unit
- Under counter installation
- Power turn on/off by direct plug in
- Universal power supply 220V/115V at 50/60Hz

Natural Evaporation of Condensate

Interior water is drained through a small hole into a stainless steel catch box. Condensate water is evaporated by warm air flow

LED lighting

Led lights are installed in the interior roof for soft lighting.

Low niose DC fan, sound level less than 35dB(A)
