## **0-36 Months Children Toy Safety Testing Equipment Small Object Tester ASTM F963 EN-71**

### **Product information:**

The small object tester conforms to the standards of ASTM F963 and EN-71 as well as ST2002. It is used to check whether there is possibility that the children's products like the toys can be swallowed by the children under 36 months.

### **Testing principle:**

The testing object is placed into the tester from any directions. If it can reach to the button of the tester, the object is proved to be small object.

### **Technical parameters:**

Standard	ASTM F963, EN-71, ST2002
Applicable age	0~36 months
Material	Stainless steel
