

QC-341 Martindale Abrasion Tester

Description

This machine is ideal for determining the abrasion resistance of paper, lining, socking, and similar types of shoe materials, particularly those made of fabric. The specimens are capably tested for four pieces per time and are rubbed over the abrasive in all directions in a complex, repetitive pattern (a lissajous figure) and at the same time, the holder rotates.

Appearance

Specification

Load	Abrasion		
	Fabric: 198g±2g	Clothing: 395g±2g(9Kpa)	Decorations: 549g±2g(12Kpa)
	Pilling		
	Fabric: 155g±1g	Clothing: 260g±1g	
Platen weight	2385g±10		
Counter	0~999999		
Sample size	φ120		
Dimension	720 x 505 x 420 mm		
Weight	115kg		
Power	220V 50Hz		

*Cometech reserves ultimate right to modify specification of the machine.
