## Take Away

**RIONET HA-20DX Pocket Type Analog Hearing Aid** is a more simple technology of RION that allows user to be able to fit their new hearing aids fast, easy and comfortably.

The advantages of simple and comfortable use were for the easy acceptance for users such as elderly. It is specifically design to be small pocket device that can last as it will have lesser contact with moisture from the skin compromising on the functionality and comfort-ability.

## WARRANTY

The RIONET HA-20DX are warranted against any defects in electronic, material and workmanship for 12 months , except in case of obvious abuse and damages.

# GENERAL USE AND MAINTENANCE

## RIONET HA-20DX

- Keep the product clean of dirt and particles by using only a soft dry cloth and also do note that gasoline, paint thinner, or other strong solvents is not to be used in cleaning.
- Typically, a battery will keep a hearing aid powered for three to ten days before it needs replacing, depending on usage and the hearing aid style. You may hear a few short beeps when it is time to change the battery.
- When cleaning, use a synthetic detergent and gently rub the surface. Air dry thoroughly. Make sure fluid never gets in. Do not machine wash or scrub it.
- Keep battery in warm place for at least 1 hour before using if it has been store at below freezing point.
- Remove Batteries only if for extended period of non-use and keep the batteries out of reach of children.
- For hygiene reasons, do not share the hearing aid.
- Limit their exposure to heat, humidity, chemicals or hard impact, and make sure they stay in good working condition.
