## **225 Sole bending /Outsole Flexing Footwear testing Equipment 90cycles/min**

### **Detailed Descriptions:**

Used to test shoe sole material on the transmission of cloth belt around the roller do the cycle test, to observe the degree of resistance to bending. Sole bending testing machine is for the flexing test of the non-leather outsole. Sew up or stick the non-Leather outsole, put it to the turning wheel. Turn on the wheel, the outsole will be flexed. After a few times, check the damage and breakage. The small wheel is motivated by the bigger wheel. There are 3 types of the small wheel with different diameter for change as to get different flexing data for comparison
