

Voltage Detector

Type HWB series

This product is for AC current, and it indicates the presence of charge in circuits with an electronic buzzer that is easy to hear and a high-luminance light emitting diode. It is **lightweight** and **easy to handle**.

FEATURES

- FRP is used for the **insulating stick**. It is of **lightweight** and has outstanding operability.

MADE IN JAPAN

Rating and Specifications

Type	HWB-30	HWB-70	HWB-170	HWB-250	HWB-500
Working voltage range	6~42 kV AC	50~120 kV AC	100~200 kV AC	200~300 kV AC	300~550 kV AC
Indication	Sound	Intermittent sound 70dB or more (2m apart)			
	Light	Stand-by state : Green LED light Operation state : Red LED flash light (Flashing red light, distinguishable in brightness of 50,000lux)			
Frequency	50/60Hz				
Design	Outdoor type				
Water proof	Equivalent to IPX4				
General design	Separate device				
Operating temperature range	-10°C ~ +40°C				
Battery	R03 (1.5V) × 2pcs.				
Accessory	Bag for housing
