

## Introduction

OC-903 portable Odor gas detector usually used to detect the Odor gas concentration indoor, landfill, bonfire, crematorium, etc. With the imported sensor, it respond quickly, good repeatability and stability, high accuracy. The gas detector installed the internal pump, makes it available for the narrow place sampling or inspecting the gas concentration from underground.

OC-903 portable gas detector with the data logger function, the data storage capacity up to 100,000 groups, through the software the historic data could upload to the computer and displaying as the drawing, data also could be download as the EXCEL file. This is very convenient for the data analysis.

Portable Odor gas detector we sell good in Aisa and Europe, received good feedback from our distributor or the end customers.

Gas type: Odor gas

Measuring range: 0~100ppm, 0~500ppm, 0~1000ppm, or customized.

Resolution: 1ppm

Gas concentration unit: ppm or mg/m<sup>3</sup>

Precision: 3%F.S

Pump flowrate: 100~1000ml/ min(adjustable)

Explosion-proof: Exia II CT4

Protection grade: IP65
