

Ion Air Purifier Electrical Stick Static Eliminating Bar AC 220V / 110V

AC 220V / 110V Ion Air Purifier Static Eliminator Bar Electrical Stick Static Eliminating Bar

Quick details:

- Item name: ionizing copper bar
- Type: Electronic component
- with two joints electrostatic charging
- Usage: Electronic Equipment ,printing machine

- bar length: 300-2500mm(customized available)

Features

- 1, Bar shaped and cross over static eliminator
- 2, Excellent electrical property data by applying the newest static eliminating technology
- 3, No short circuit of discharge electrode, long lifetime
- 4, Working under high voltage and micro current (μA level)
- 5, Low dustiness of transmitting electrode and fit for working area of high purification level
- 6, Stripe shaped notch on the back of the bar for users to fasten the bar with $\Phi 6$ diameter screw

Industry Applications

AC 220V / 110V Ion Air Purifier Static Eliminator Bar Electrical Stick Static Eliminating Bar is used in electronics, optoelectronics, semiconductors, plastics, textile, films and printing industries

Specification

Item	AP-AC5702 anti static bar for thin film 1512
Model	AP-AC5702
Working Voltage	AC5600V
Power	28W
Ion balance	-15~+15V
Discharge speed	$\leq 2.5\text{s}$
Working distance	30-100mm
Wire length	2.5m(customized available,5m as longest)
Power Supply	AP-AC2455-56
Bar length	customized available
