

## YDQW Series Gas Type HV Testing Transformer for PD Test

### Product Description

This Series incorporates the most advanced SF6 gas application technic, with features of safety assurance, accident prevention, and inspection maintenance.

### Features

- Outstanding nonflammability.

- Safety, with good insulation effects.
- Light weight, no oil pollution.
- Unaffected by climate, little corona, long service life.
- No maintenance.
- Suitable for Partial discharge test or Hipot test with small PD value.

### **Specifications**

- Rated Input Voltage: 200V, 400V
- Single Rated Output Voltage: 0~300kV
- Capacity: 1~300kVA
- Ratio Error:  $\leq \pm 1.0\%$
- Impedance Voltage:  $< 10\%$
- Surface Temperature:  $< 55^{\circ}\text{C}$
- PD amount:  $< 5\text{pC}$
