

# DLWD-DJ21 Electric Motor and Transformer Comprehensive Experimental Device

## Product Description

### Electrical Training Equipment

#### ■ Electrical Training Equipment-Device Overview

- The **device** is equipped with three-phase adjustable AC power supply, DC adjustable power supply, single-phase transformers, three-phase transformer, DC measuring instruments, AC measurement instruments, and it also equipped with adjustable resistive load and motor units, it mainly complete test and data analysis of single-phase transformer, three-phase transformer, three-phase asynchronous motor and compound excitation DC motor etc.

#### ■ Electrical Training Equipment Technical Parameter

- **Electrical Training Equipment Total dimension:** 1950×700×1500mm
- **Electrical Training Equipment Input power:** three-phase, five-wire 380V±10% 50Hz/60Hz

- **Electrical Training Equipment Output power:**

AC 380V Adjustable power safety terminal output

AC 220V Safety terminal isolation output

AC 24V Safety terminal isolation output

DC 220V Safety terminal isolation output

- **Electrical Training Equipment Capacity: < 1.5KVA**
