Enhanced Durability, Sensitivity and Readability

Inspection

- The QR code is used by the factory to accurately match the inspection certificate to the test indicator.

Stylus length is marked on the dial face

- Stylus length is marked on the dial face to assist customers when ordering replacement styli.

Attachable limit hands

- Limit hands (optional) can be attached to the bezel, allowing easy identification of the upper and lower limits of tolerance.

ø8/ø9.52 stem to fit dovetails is a standard accessory

- A ø8mm (ø0.315 in) plain stem (**21CAB104**) for the Metric models or a ø9.52mm (ø3/8 in) plain stem (**21CAB105**) for the Inch models that attaches to any dovetail on the frame is supplied as a standard accessory. Other sizes are available as optional accessories:

ø4mm (ø0.157 in) stem: **21CAB106**

ø6mm (ø0.236 in) stem: **21CAB103**

certificate provided

Extended stylus length for 0.001mm, 0.002mm, and 0.0001" graduation models

- Longer styli for the most sensitive indicators allow access to difficult-to-measure features.

0.001mm graduation models: L2 now 15.2mm, was 11.2mm
 0.002mm graduation models: L2 now 11.2mm, was 9.4mm
 0.0001 in graduation models: L2 now 0.61 in, was 0.45 in

Ruby ball-tipped stylus added

- A ruby tip has wear-resistance several times greater than a carbide tip and, since it is nonconductive, it can be used safely on an electrical discharge machine.

Enhanced Durability, Sensitivity and Readability

Crystal for readability

- Glare-free flat crystal face allows easy reading of graduations.

Conventional

New

Prevents dust and oil from penetrating the dial face

- The O-ring seal on the bezel provides smooth rotation and prevents dust and oil from penetrating the dial face.

Bonded bezel and crystal

- Bonding the bezel and crystal eliminates a gap for cutting fluid or oil to penetrate the dial face.

Prevents bezel detachment

- A flange prevents the bezel from unintentionally being removed during handling.

Conventional

New

Maintain trackability

- The ability of the indicator to track small changes in displacement deteriorates with prolonged use due to minute changes in clearance between the gears. Redesigned mounting for the gears enables the ability to maintain good trackability.

Improved readability

- Using universal fonts, changing dial face color and reviewing the relationship between pointer and scale marks have drastically improved readability.

Conventional

New

Parts

Choice of dial position

Four models are available, each with a different orientation of the dial to allow the best visibility in any situation.

- Horizontal (standard model) - dial is on top of the frame.
- Vertical: dial is on the end of the frame.
- Horizontal (20° tilted face): dial is on top of the frame but tilted 20°.
- Parallel: dial is on the side of the frame.

Multi-layer coatings on the crystal

- Hard, antifouling and non-glare coatings on the crystal inhibit scratches, contamination and glare on the surface.

Improved stylus bearing

- The conventional method of mounting the stylus pivot bearing screw in the frame is prone to loosen with prolonged use. A unique sub-plate structure has been incorporated in all models to eliminate this issue.

Stylus bearing screw held in frame.

Stylus bearing screw held in sub-plate.

Indicator trackability depends on maintaining gear-train stability

* Stem with ø6 dovetail groove is not included in the mass.

* Be sure to perform calibration with reference gage, etc. after changing the contact point. The inside parts may be damaged when the contact point is changed due to the breakage. In the case the of the significant deterioration during the operation, repair is required.

Parallel (The scale can be read from the front, with the contact point pivoting in a plane parallel to that of the dial face.)

- ☒ With revolution counter
- ☒ Long stylus
- ☒ Carbide contact point (Anti-magnet)

513-443-10

Contact point No. 21CZB064

Graduation: 0.0001 in
Range: 0.016 in

513-443-10A/513-443-10T

- ☒ With revolution counter
- ☒ Carbide contact point (Anti-magnet)

513-443-16

Contact point No. 21CZB064

Graduation: 0.0001 in
Range: 0.016 in

513-443-16A/513-443-16T

- ☒ With revolution counter
- ☒ Carbide contact point (Anti-magnet)

SPECIFICATIONS

Metric

Order No.			Graduation	Range	Dial reading	Indication accuracy				Mass	Measuring force	High accuracy	With revolution counter	Long stylus	Standard	Double scale spacing	Compact	Carbide contact point (Anti-magnet)	Ruby contact point (non-magnet)
Basic set	Plus set	Full set				Measuring range	10 scale divisions	Hysteresis	Repeatability

* Stem with ø6 dovetail groove is not included in the mass.

* Be sure to perform calibration with reference gage, etc. after changing the contact point. The inside parts may be damaged when the contact point is changed due to the breakage. In the case of the significant deterioration during the operation, repair is required.

DIMENSIONS

Unit: mm

Order No.	L1	L2
513-445-10E	18.7	15.2
513-444-10E	20.9	17.4

Refer to MEASURING INSTRUMENTS CATALOG No. US-1004 for the accessories such as styli, stems with dovetail, holding bars, etc.

**Whatever your challenges are,
Mitutoyo supports you from start to finish.**

Mitutoyo is not only a manufacturer of top-quality measuring products but one that also offers qualified support for the lifetime of the equipment, backed by comprehensive services that ensure your staff can make the very best use of the investment.

Apart from the basics of calibration and repair, Mitutoyo offers product and metrology training, as well as IT support for the sophisticated software used in modern measuring technology. We can also design, build, test and deliver measuring solutions and even, if deemed cost-effective, take your critical measurement challenges in-house on a sub-contract basis.

Mitutoyo

Note: All information regarding our products, and in particular the illustrations, drawings, dimensional and performance data contained in this printed matter as well as other technical data are to be regarded as approximate average values. We therefore reserve the right to make changes to the corresponding designs. The stated standards, similar technical regulations, descriptions and illustrations of the products were valid at the time of printing. In addition, the latest applicable version of our General Trading Conditions will apply. Only quotations submitted by ourselves may be regarded as definitive. Specifications are subject to change without notice.

Mitutoyo products are subject to US Export Administration Regulations (EAR). Re-export or relocation of our products may require prior approval by an appropriate governing authority.

Trademarks and Registrations

Designations used by companies to distinguish their products are often claimed as trademarks. In all instances where Mitutoyo America Corporation is aware of a claim, the product names appear in initial capital or all capital letters. The appropriate companies should be contacted for more complete trademark and registration information.
