

## **DLDZ-DLDZ02 Power Electronics and Automatic Control Training System**

- This power electronics and automatic control trainer includes 16pcs modules with independent function:
  - DC5V / 4A flyback switching power supply training module, monolithic integration 40W flyback switching power supply training module, single-junction transistor trigger circuit training, discrete components sawtooth trigger circuit training, practical training phase trigger module, the sine wave trigger training module, half-controlled single-phase AC voltage regulator module training trigger, single-phase full-controlled rectifier trigger training module, single-phase SCR trigger training module I, single-phase SCR trigger training module II, two-way SCR trigger training Module I, triac trigger Training Module II, new devices feature training module, DC chopper Training Module I, DC chopper Training Module II, inverter experiment module). user may choose at random
  - Total dimension: 3468×800×1764mm
  - Output power: AC 220V safety socket output

- Capacity: <1.5KVA
- Total dimension: 3468×800×1764mm
