

DLJX-ZT501 Mechanical Assembly and Adjustment technology Comprehensive Training System

■ Overview

- The equipment consists of a variety of mechanical modules, it can complete independent module training and comprehensive training. Such as: two-dimensional table, multi-stage gearbox, gear reducer, indexing turntable, punch agencies. Mechanical alignment techniques fitter basic operations, assembly, measurement and regulation, quality inspection work processes designed, it can meet the training and vocational skills racers' needs.

■ Technical Parameter

- Input power: single-phase, three-wire AC220V±10% 50Hz/60Hz
- One AC gear motor: constant power 90W Reduction ratio 1:25
- Workbench size: 1060×760×1350mm, Operation table size : 1000×760×860mm
- Weight: 600kg

■ Optional

- Simulation software
- Enhance reality simulation software: Install the software in the mobile terminal, it can obtain relevant learning resources through the picture which is taken from the textbooks, such as dismantling animation equipment, run the animation, the principle of animation.
