

DLMPS-500C Modular Flexible Production System

■ Overview

- This system mainly consists of 5 stations, respectively is: distribution unit, testing unit, processing unit, robot handling unit, sorting and storage unit.
- The difference between DLMPS-500A Training System is that the robot handling unit adopts swing cylinder manipulator.

■ Technical Parameter

- Total dimension: 3000×800×1420mm
- Input power: single-phase, three-wire

AC220V±10% 50Hz/60Hz

- Capacity: ≤ 2KVA

■ Optional

- Computer, computer desk
- PLC module
- Air compressor
