

DLLY-FB1 Security Alarm System Training Device

■ General

DLLY-FB1 Security alarm system training device is comprehensive training device which elaborate designed based on current building electrical, building intelligence professional training content. This training device combined with the latest technology of the guard against theft in the current security market, training content is rich. This device also includes various types of the police probe and the linkage equipment with the monitor, to make the teaching researchers comprehensively understanding and master of various application mode of the security alarm system, provide good teaching platform for teaching practice research security alarm technology.

This training system can do all kinds of simulation security alarm system linkage operation demo systematic setting, programming, line design, line and judging and exclusion of setting fault, etc and training and training content.

■ Product feature

- The training device combined with the latest technology in the current security market, stability of the system is strong.
- The device contains various types of alarm detector, and with cameras and other linkage equipment
- PC software can achieve certain cloth removal function, can realize the group management

■ Technical parameter

- Input power: AC220V $\pm 15\%$ 50Hz
- Environment temperature: $-20^{\circ}\text{C} \sim +45^{\circ}\text{C}$
- Capacity: $< 1\text{kVA}$
- Dimension: 1668mm * 805mm * 1484mm
- Security protection: with leakage automatic protection device.
