

DDLY-1301A Building Automation Engineering Skill Training Evaluation System

■ Overview

- The system includes intercom access control systems, security systems, surveillance systems, fire extinguishing system, network cabling system, automatic curtains control system, Siemens DDC network control system, intelligent air conditioner control system, intelligent street lighting control system, computer remote intelligent home control system, computer remote video real-time monitoring system, intelligent Patrol management system, intelligent temperature control system.

■ Technical Parameter

- Total dimension: 5920 X 3492 X 2490mm
- Input power: single-phase, three-wire AC 220V \pm 10 % 50Hz/60Hz
- Output power: single-phase, three-wire AC 220V \pm 10% , DC24V , DC 18V , DC 12V safety terminal output
- Capacity: < 5KVA
