

Surface Area Analyzer With One Testing Position

- Item No.:TOB-BET-01
- Order(Moq):1
- Payment:L/C,T/T,Western Union
- Product Origin:China
- Shipping Port:XIAMEN
- Lead Time:7

Product Detail

Best Price For Surface Area Analyzer For Powder Materials Research

SPECIFICATIONS

The TOB-BET Specific Surface Area Instrument is used for Battery materials, magnetic materials, catalyst, adsorbent, cement, ceramic raw materials, metallurgical raw materials, carbon, silica, inorganic materials, coatings, abrasive, nano materials, medicine powder, rare earth, porous material, composite material powder and granular material specific surface area measurement. industry, building materials, coatings, abrasive and other industries.

Model	Specific Surface Area Tester TOB-BET-01
Voltage supply	AC 110V/220V 50HZ/60HZ±10%
Power	300W
Warranty	One year limited warranty with lifetime support
Technical principle	Dynamic nitrogen adsorption surface area tester, using gas chromatography, low temperature adsorption principle
Measuring range	0.1m ² /g~3500 m ² /g
Measure time	5min/sample, Can test one sample every time
Measuring accuracy	< ±1%
Testing method	Single point test, contrast test, multi point (BET) analysis.
Dimension(L*W*H)	700*360*710mm
