SCD -102B Automatic strapping machine (carton packer)

MH-102B low platform unmanned packing machine is suitable for the use of low surface assembly line. The platform is equipped with 8 dynamic galvanized embossing rollers, which can automatically detect, automatically pack and automatically transport, and the roller's embossing treatment increases the friction force at the time of residence, and makes the packing position more accurate. Widely used in food, chemical, clothing, post, logistics and other industries.

**Electrical configuration:** "OMRON" "PLC" control, France "TE" photoelectric switch, Japan "OMRON", "ZIK" electrical appliances and so on.

#### Scope of application

**Heavy or large object bundles suitable for automatic packaging lines**

#### technical parameter :

Product model	SCD-102B
Long men frame size	W800*H600mm
Table Height	450mm (Customizable at the height of the user's needs)
Binding method	Parallel 1~ multichannel; optoelectronic control, manual, etc
Tighten force	0-60kg (Adjustable)
Machine size	L1900 W650 H1850mm
power	3φ220V/380V 1000kw
Packing speed	≤2.5Second / Channel
Packing belt specification	thick (0.55~1.2) mm*wide (9~15) mm
Net weight	360kg
