PGT 50 RE

With the calibration box PGT 50 RE you can calibrate your device on your own. That provides you several advantages:

Time savings

No need to send the device in. Device is still available.

Cost savings

For the customers with multiple devices it is profitable to do the calibration on his own. There are just one time the costs for the examination of the reference resistors.

Guaranteed future

The PGT 50 is a future-proof investment because it can easily and budgetly be adjusted to changes of norms or needs with the reference resistors.

Individual tresholds

On demand we ship the reference resistors PGT 50 RE in customer selected values. So you can adjust your device exactly to your needs.

djust your device exactly to your needs.
