

ARTESYN MODULAR HIGH POWER SYSTEM

Up to 24000 Watts

Designed for a wide range of medical, industrial, lighting/ horticulture and semiconductor applications, Advanced Energy's iHP configurable precision power system provides accuracy, resolution and stability as either a programmable voltage or current source. It provides up to 24 kW in 3 kW increments and can be configured for up to 8 outputs using a wide variety of plug-in modules that address a large range of voltages and currents.

Safety approvals secured by Advanced Energy eliminate the need for an isolation transformer in medical equipment. The iHP power system also has industrial safety approvals, including compliance to the SEMI F47 standard for semiconductor processing equipment.

The iHP power system offers developers either an analog or digital interface to their system supporting standard communications protocols, while a software graphical user interface (GUI) allows for easy configuration and user Dashboard creation. For Horticulture customers, detailed scheduling and control software is available. For non-medical applications, a smaller and lighter rack is now available using the same plug-in modules.

SPECIAL FEATURES

- 5 years manufacturer's warranty
- Multi output intelligent and modular high power system
- Standard 19" rack
- Outputs parallel up to 1600 A
- Outputs series up to 1000 V
- 100% digital control
- Outputs program as voltage or current source

- Versatile input configurable to:
 - Low line 180-264 Vac single phase and 3-phase
 - · High line 342-528 Vac 3-phase
 - High line 540-660 Vac 3-phase (iHP24C)
- Medical Safety Approved on iHP12 and iHP24, not on iHP24S or iHP24C
- Analog Interface either 0-5 V or 0-10 V for both current and voltage. Compatible with, but not limited to Priva, Argus, TrollMaster and Hortimax controllers, In lighting applications

Note 1: Digital Ethernet UDP, RS485, CAN or Ethernet TC/IP with PowerPro Connect Module option. Command protocol is patterned to PMBus specification using a proprietary transaction protocol. DATA SHEET

iHP24

Total Power:

Up to 24 KW per 3U rack. Up to 144 KW in an 18U Cabinet

Input Voltage

iHP12, iHP24 and iHP24S: 180-264 Vac 342-528 Vac Single or 3-Phase for iHP12 3-Phase for iHP24 and iHP24S

iHP24C: 540-660 Vac 3-Phase for iHP24C

of Outputs:

Up to 8

iHP

- Flexible digital control interfaces (Note 1)
- Air cooled
- Semi F47 compliance (except for iHP24S)
- Field upgradeable firmware
- Programmable slew rate
- Fast current slew rate up to 200 Hz
- Active power factor correction
- User defined command profiles
- Very low THD compared to LED Drivers when used in lighting applications

SAFETY

SAFETY FOR ALL MODELS (except for iHP24S and iHP24C models)

- UL 62368-1
- CSA C22.2 No. 62368-1
- EN62368-1
- EN60601-1
- IEC60601-1
- UL 60601-1 1st Edition; ANSI/AAMI ES60601-1 (2005 + C1:09 + A2:10) "3rd Ed"
- CAN/CSA-C22.2 No. 60601-1 (2008)
- IEC60601
- UL/cUL listed to UL 508 and CSA C22.2 No. 107.1-01, CSA to CSA C22.2 No. 107.1-01

- CB Certificate and Report
- CE LVD (EN62368-1 + RoHS)

SAFETY FOR CANADIAN MODEL iHP24C3A ONLY

- UL60950-1 with UL62368-1
- CSA C22.2 No 62368-1

SAFETY FOR IHP SHORT RACK IHPS24H3A & IHPS24L3A

ORDERING INFORMATION (CONTINUED)

MODEL NUMBER SHORTCUT

For repeated like modules in parallel or series, instead of listing all the same modules separated by a "-", you can simply list the module once and then follow by the number of times it repeats enclosed in parenthesis.

For example: iHP24H3A-SW-SW-SW-SW-SW-S8-S8-00

would become: iHP24H3A-SW(6)-S8(2)-00

POWERPRO CONNECT MODULE

P@WERPRO

Part number:73-778-000A

The PowerPro Connect Module (purchased separately) can provide standard Ethernet interface via the internet to a cloud- and dashboard-based user-configurable GUI.

Advanced Energy (AE) has devoted more than three decades to perfecting power for its global customers. AE designs and manufactures highly engineered, precision power conversion, measurement and control solutions for mission-critical applications and processes.

Our products enable customer innovation in complex applications for a wide range of industries including semiconductor equipment, industrial, manufacturing, telecommunications, data center computing, and medical. With deep applications know-how and responsive service and support across the globe, we build collaborative partnerships to meet rapid technological developments, propel growth for our customers, and innovate the future of power.
