|------------------------|--|
| Make | ZEAL |
| Model | ZMDIB |
| Specifications | Decades of 10 μ H, 100 μ H, 1mH, 10mH, 100mH |
| Total Inductance range | 1.11111 H |
| Accuracy | 1% at 1 kHz |

|---|
| Decade inductance box is a source of inductance ranging from 10 μ H to 1H. Decade switches are provided to set the desired value |
| The decade switches used have low contact resistance and low thermal emf. |
| Decade Inductance Box is custom wound and high permeability ferrite cores ensure insignificant influence from external magnetic fields and maximum stability. |
| It is a metallic box with powder coating & screen printing. |
| Accessory : Set of banana to banana cables of suitable length |
