

HRS-200/160 High Solution Spectroradiometer

0.2nm ultra-high Resolution& super-fast measurement speed

HRS series inherit the excellent performance of EVERFINE high speed array spectroradiometer and provide extremely high spectral resolution, which is suitable for the measurement of narrow-band emitters e.g. laser diodes, LEDs, VCSELs, etc.

Equip with EVERFINE test accessories, it can realize the following parameters :

- Spectral power distribution
- Peak wavelength
- Bandwidth
- Radiation power

- Spectral range : 800-1000nm ;
- Full width at half maximum (FWHM) : 0.2nm ;
- Wavelength accuracy : 0.05nm.
