

VGS-200 VCSEL Gonioradiometer system

Automatic, intelligent and customized

VAT-2000 VCSEL automatic online test system can test spectrum, FOV, radiation and electrical parameters online for VCSEL, it can evaluate the safety level of human eyes automatically. The system can automatically identify pass or failed products according to measurement results and customer classification files.

- Spectral range : 800-1000nm;
- Spectral power distribution,peak wavelength,bandwidth;
- Radiation power, radiation efficiency;
- Eyes safety;
- FOV Online quick test;
