

DMS-1500 Optical Property Test System for Smartphone and Tablet

Measurement of optical properties of display under 15 inches such as smartphone, flat panel, navigation screen, LCD module including luminance uniformity, color uniformity, chromaticity coordinates, color gamut area, color gamut coverage, luminance contrast, viewing angle, white balance error, response time, gray scale, flicker, crosstalk and etc. The system includes five axis automatic rotation and black metal box(Optional). The size of the tested display is 3-15 inches, meeting the requirements of IEC, TCO, IDMS and other related standards.

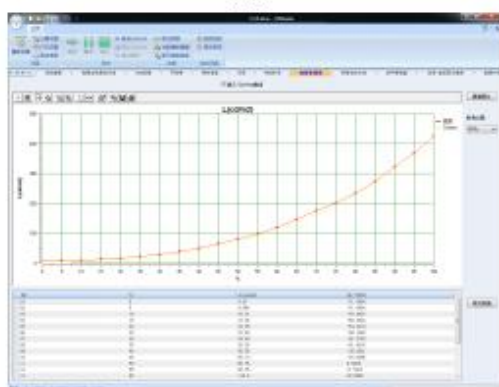

Software Interface:

Model	DMS-1500
Sample	Horizontal placement
X translation	±180mm
Y translation	±180mm
Z translation	350mm~600mm adjustable
Translation resolution	0.01mm
Fixture	Clamping device can perform pitch adjustment
Alignment device	Software auto-alignment can be achieved by the cross laser alignment device and the line laser alignment itself.
Monitoring	Video monitoring system
Optical test instrument	SRC series spectral color luminance meter, CX series imaging luminance meter, and etc.
Test speed	Quick, medium and slow for choice
Rotation Phi (H axis)	-90° ~ +90°
Inclination Theta (V axis)	-90° ~ +90°
Angle	±0.1°
Resolution	
Signal generator	Android mobile phone install remote special graphics swiching software, computer graphics card HDMI, VGA, DVI and other output, Windows system image signal generating software, customer's signal driver and etc.
Response time and flicker	The quick response tester is equipped to realize the response time and the flicker test.
Power supply	High precision precision DC power supply and electrical parameter tester
Darkroom	Metallic dark box

Phone

Vehicle navigation screen
