

Fabric pick counter TH-057

Detailed Description

The yarn density test instrument is used for fast, convenient and accurate determination of the thread density of various kinds of fabrics such as cotton, wool, twine, slik, chemical fibre and blend fabric etc. And it meets the national standard GB8678-88 "Fabric structure analysis-density determination of woven and fabric".

Specifications:

Applied standard: GB/T4668; ISO7211.2

Magnifying power: 10X, 20X

Lens moving range:

- Metric 0~50mm

- Inch 0~2"

Minimum scale division value:

- Metric: 1mm

- Inch: 1/16"

Dimension: 97*53*35(mm)

Weight: 0.3kg
