

Coating Adhesion Tester TNJ-038

Detailed Description

To test the adhesion bond strength of applied coatings.

Press scratch according to cycloid.

Within the scope of the complete coating degree evaluation, expressed as a level (1-7).

Applicable to coating adhesion test fast.

Specifications:

Adhesion tester screw pitch of 1.5mm, its rotation and needle synchronization

Rotation needle turning radius values R5.25mm

Weights: 100g, 200g(2pcs),500g

Brush width: 25-35mm

Test environment: Temperature: $23\pm 2^{\circ}\text{C}$

Relative humidity: $50\pm 5\%$

Standard: GB/T 1720-89
