

Blanket Flammability Tester HTB-005

Detailed Description

Blanket Flammability Tester to test blanket fabric flame retardant performance and fabric surface flame spread performance, the test method is within the stipulated time, to standardize the flame was carried out on the sample surface combustion, the combustion of standard test paper, to look at the degree of damage or discoloration, and fabric for grading evaluation of the test.

Specifications:

Test chamber: 37cmX22cmX35cm, top gas vent diameter: 12.7mm*12

Clamp: 2.5"

Flame length: 16mm

Firing time: 30s

Specimen dimension: 70mmx70mm

Dimension: 42x26x52cm (L×W×H)

Weight: ≈20Kg

Power: 1φ AC 220V 50Hz 3A

Standard: ASTM D4151
