

## Simulate Transport Vibration Tester TL-413

### Detailed Description

Used for simulation testing of toys, electronics, furniture, gifts, ceramics, packaging etc. Conform to U.S. and European transport standards.

Applied Standard: EN, ANSI, UL, ASTM, ISTA standards of international transport

### Specifications:

Vibration frequency: 100~300rpm(r/m) continuous adjustable

Amplitude: 25.4mm (1 inch)+ 15% max load (100~300LB)

Testing table Size: 1000\*900mm (L\*W)

Revolving speed accuracy: 3 turn/minute (digital display)

Working time setting range: 0~99.99 hours

Motor power: 1HP

Machine weight: 200kg

Power Voltage: 220V 50Hz single phase, maximum current 5A
