

NBS Rubber Abrasion Tester HTX-010

Detailed Description

NBS Abrasion Tester is used to determine the resistance to abrasion of rubber products and sole materials. Widely used in rubber tire, chariot tracks, sole, etc. Of the rubber products abrasion resistance test, it's a good is to assist the industry to control the product quality.

Specifications:

Specimen size: 25.4×25.4×6.35mm

Load: 2265g (5LB)× 3pcs

Drum diameter: 150mm

Speed: 45±5rpm

Abrasive paper 40#

Counter LCD display: 0~999.999

Suction of dust collector: 2.1kg/cm²

Dimensions: 560×520×520mm(L× W× H)

Weight: 74kg approx

Power supply: AC 220V, 3A

Standard: ASTM-D1630
