## HD-NR-203B Horizontal vertical burning test machine

Designed according to the UL94 standard, the ignition risk of household appliances, parts and components of electrical and electronic products is assessed mainly by analog technology measurement.

### Technical Parameters:

Serial number	Project	Specifications
1	Power supply	220V 50/60Hz 2.5A
2	Burner	The inner diameter is about 9.5mm and the length is about 100mm.
3	Test gas	Methane, liquefied petroleum gas (self-provided)
4	Gas flow accuracy	2%
5	Gas pressure accuracy	10mm water pressure difference
6	Burning angle	45 degrees or 90 degrees
7	Dimensions	1050mm×600mm×1300mm (L×W×H)
8	Combustion box volume	0.5m <sup>3</sup>
