PRODUCT DETAILS

PRODUCT VIDEO

MoPao260 Metallographic Grinding and Polishing Machine

1. Application and Feature of Grinding-Polishing Machine

The grinding-polishing machine is a double-disc desktop, applicable to rough grinding, accurate grinding and polishing of metallographic sample. The machine has two-step constant speed of 150rpm and 300rpm, thus widening its application. The machine is an indispensable equipment in making the metallographic sample. The machine has a cooling device to cool the sample during grinding and polishing, thus preventing the damage of the metallographic structure caused by overheat of the sample. The machine, easy to use, safe and reliable, is an ideal sample preparation equipment for the labs of plants, research institutes and universities and colleges.

2. Main Specifications:

Model	MoPao260
Grinding/Polishing Disc Diameter	250mm (203mm can be ordered)
Rotate speed	300/600r/min(500/1000r/min 150/300r/min) can be customize
Grinding/Polishing disc quantity	2
Grinding/Polishing disc control	Single
Motor	370W
Operating voltage	AC 380V 50HZ
Dimension	725×710×310mm
Weight	45kg
