HD-FSX-1 Non-solid plug compression test device

The device is mainly used for measuring the strength of the material of the plug itself under a certain pressure of the non-solid plug, and whether there is obvious deformation under the specified test conditions.

Design according to the standard requirements of Figure 14 of IEC60884-1:2006, GB2099.1-2008, GB2099.3-2008.

Technical Parameters:

Serial number	Project	Specifications
1	Weight	100N±1%
2	Mandrel diameter	4.8mm
3	Number of stations	Single station
4	Replacement test method	Manual
5	Material	45# steel plating treatment
6	Stabilizer	With horizontal stabilizer
